PROJECTS

DEEP LEARNING FOR IMAGE BASED BIBLIOGRAPHIC DATA EXTRACTION

TEAM PROJECT

- Developed and integrated backend systems to extract and process bibliographic data from scanned academic documents using deep learning models for image and text recognition.
- Built an interactive Streamlit-based frontend for real-time file uploads, extraction previews, and feedback, enhancing user accessibility and interface simplicity.

RESTAURANT RESERVATION AND SEATING MANAGEMENT SYSTEM

TEAM PROJECT

- Designed and implemented a web-based system to manage table reservations, real-time seating availability, and customer flow, optimizing restaurant operations and reducing wait times.
- Integrated dynamic table assignment algorithms and an intuitive customer user interface to streamline booking, improve experience and support peak-time efficiency.

CERTIFICATIONS
