Education

B.E. Computer Science Engineering

Bannari Amman Institute of Technology
APRIL - 2025
CGPA: 7.1 / 10

12th CBSE

Senthil Public School
MAY - 2021
Percentage: 79%

10th CBSE

Kailash Maansarovar School
MAY - 2019
Percentage: 82.4%

Skills

Languages

Python, SQL, C

Web & Backend

FastAPI, React, HTML/CSS, JavaScript

Data Tools

Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Databases

MySQL, MongoDB, Oracle SQL

Automation & Web

Playwright, BeautifulSoup, Scrapy

Security & Testing

OWASP ZAP (DAST), pytest

Visualization

Power BI, MS Excel

Tools & Platforms

Git, VS Code, Jupyter, Google Colab, Streamlit, Antigravity, Windows/Linux

Certifications

- AI & Data Science Using Python (Grade: A) — CDAC
- Complete Data Analyst Bootcamp (Udemy)
- Data Analytics using AI (E&ICT Academy, IIT Kanpur)

Languages

English (Fluent)
Tamil (Native)

Professional Summary

Computer Science graduate with hands-on experience across full-stack development, automation, and application security. Skilled at writing production-grade Python and SQL, debugging complex backend logic, and designing test workflows — with a track record of working closely with engineering teams to deliver reliable, well-documented systems under deadline pressure.

Work Experience

Developer

[BDSR Solutions LLP](#)

Mar 2026 – At Present

- Engineered automated web scrapers to extract data from dynamic web applications, successfully navigating complex pagination, location overlays, and multi-stage HTML processing to build robust data pipelines.
- Optimized Python connection-pooling logic to process data for multiple companies through a single API session, drastically reducing execution time and boosting overall backend performance.
- Transitioned to a core Full-Stack Developer role on **Quantis**—a comprehensive Flask/React enterprise platform built to track, evaluate, and visualize employee performance metrics.
- Spearheaded the end-to-end development, debugging, and testing of comprehensive Dashboards; also implemented seamless API integrations to ensure the accuracy, real-time visualization of agent performance metrics and scorecards.
- Managed seamless remote application deployments to project servers utilizing PuTTY and WinSCP, and collaborated actively using Git for version control, code reviews, and task prioritization.

Data Analyst Intern

[Zidio Development](#)

May 2025 – Jun 2025

Remote

- Cleaned operational data using Pandas and Excel – fixed missing values, removed outliers, and standardized formats across datasets.
- Built Power BI dashboards showing revenue trends and customer metrics, reducing time spent on manual weekly reports by about 30%.

Technical Projects

Bibliographic Data Extraction Using Deep Learning

Python

[Github](#) | Streamlit, spaCy, PyMuPDF, OpenCV

- Created Streamlit web app that extracts author, title, year, and DOI from research papers and scanned documents.
- Used spaCy's named entity recognition and custom Regex patterns to identify and extract bibliographic fields from text.
- Applied OpenCV preprocessing (thresholding, deskewing) and Pytesseract OCR to handle low-quality scanned PDFs, improving extraction accuracy by about 20%.

Image Captioning

Python

[Colab Notebook](#) | JSON, Matplotlib, PIL

- Loaded and explored COCO caption dataset with 10,000+ image-caption pairs to understand annotation structure.
- Analyzed caption statistics (length distribution, word frequency) and visualized sample images with their corresponding captions.
